

It's time to take control of

CYLINDER TRACKING

Advanced Cylinder Management

 TRACKING CYLINDERS SINCE 1997

Oxygen Service Company is currently the only welding gas distributor in the metro area utilizing a 100% bar code cylinder tracking system. We can find those missing cylinders for you, or just provide you with cylinder traceability. With this system, we've increased our quality control, provided customers with long-term cylinder history records, and reduced the number of lost cylinders. Since this program began we have had numerous examples of bar code success where lost or missing cylinders were recovered for our customers. Let one of our Cylinder Specialists explain our program to you.

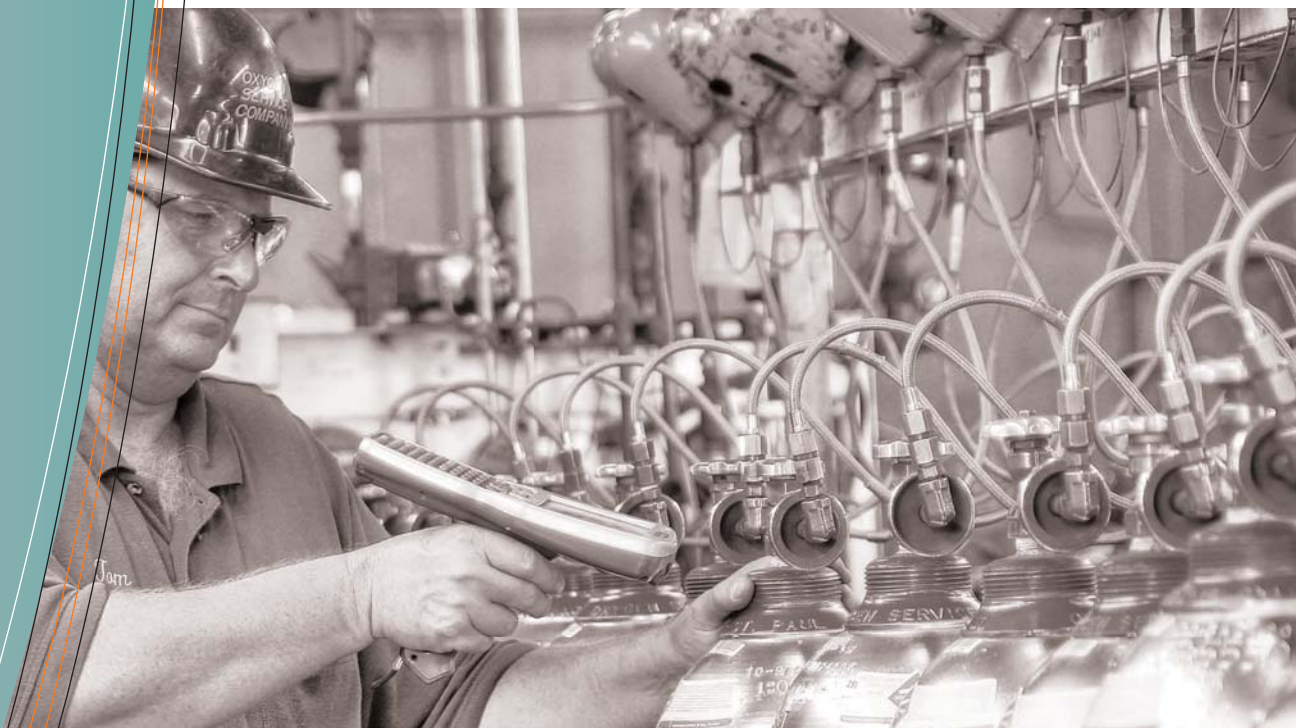

BENEFITS TO YOU THE CUSTOMER

- INCREASED CYLINDER TRACEABILITY
- INCREASED QUALITY CONTROL
- REDUCED NUMBER OF LOST CYLINDERS
- INCREASED CYLINDER RENTAL AND BILLING ACCURACY
- LONG-TERM CYLINDER HISTORY RECORDS
- REDUCTION OR ELIMINATION OF ON-SITE CYLINDER AUDITS

do you know where your cylinders are?

WE DO.

Oxygen Service Company utilizes a
100% bar code cylinder tracking system.

TRACKING YOUR CYLINDERS EVERY STEP OF THE WAY

Cylinder movement is tracked in real-time over a Wi-Fi network; from the fill cycle, onto the truck, out to the customer, and back to OSC where the cycle begins again. Additionally, we track cylinders to and from vendors, between our St. Paul and Sauk Rapids stores, and to and from our various stock point locations.

GET THE INFORMATION YOU NEED

Stop wasting time trying to internally track the movements of your cylinders. OSC already has the data you need. Examine your on-site cylinder inventory, identify slow moving cylinders, and control excess quantities effectively.

Other ways to use information:

- Confirm delivery dates, times, and see who signed for proof of delivery
- Locate lot numbers to identify multi-component gas mixtures, concentrations, & tolerances when re-ordering specialty gases
- Identify lost cylinders from jobs that have already been completed
- Flag stolen cylinders and receive notification when they have been returned

• Receive account information quickly via fax or email to help make informed decisions regarding cylinder issues or disputes

- Gain a better understanding of how 100% cylinder tracking helps you

CYLINDER ERROR CORRECTION

A time-tested system that instinctively evaluates cylinder errors and provides corrective options via the cylinder exception handler to quickly and effectively resolve cylinder issues. Meanwhile, clean transactions are processed and post to the account's cylinder balance without delay.

SATISFIED CUSTOMERS

Whether it's providing cylinder audit reports for multiple job sites, tracing back through the transaction history of a specific bar code, or notifying a customer that cylinders they previously reported lost have been returned, OSC customers experience the immense value of 100% bar code cylinder tracking every day.

EVERYTHING FOR WELDING

SPECIALISTS IN GASES

Bulk Gases, Industrial Gases, Specialty Gases, Laser Mixes, Nitrogen Purge Systems, Dedicated Specialty Gas Lab, Manifold & Piping Systems, Gas Apparatus Expertise, 100% Bar Code Cylinder Tracking, Pipeline Pressure Testing, Gas Systems Customized To Your Specific Needs.

CUSTOM AUTOMATION

Robotic Welding Equipment, Plasma Oxy-Fuel Cutting Equipment, Automated Welding Systems, Pipe Cutting & Welding Systems, Positioning Equipment, Robotic Work Cells, Tooling & Fixtures, Automated System Development, Integrating & Training, Laser/Mechanical Tracking Systems.

REPAIR SERVICE & RENTAL CENTER

On-Site Maintenance & Repair, Certified Factory Technicians, Warranty Repair Service Center, State-Of-The-Art Repair Facility, Cutting Machine Installation & Service, Robotic Programming & Maintenance, Gas Apparatus & Regulator Repair, Reliable Rental Equipment, Long & Short Term Rentals, Rental Equipment Of All Types (Gas & Diesel Welders, Plasma Cutters, MIG & TIG Equipment, Fume Extractors, Mag Drills, Etc.).

CUSTOM BAND SAW BLADES

In-House Custom Band Saw Blades, High Quality Materials, Welded-to-Length Blades, Uniform Blade Thickness, Extensive Production Life, Large Selection, Competitively Priced, Same-Day Turn Around, American Made, Customized To Meet Your Specific Needs.

PRODUCTS, EQUIPMENT & SUPPLIES

Oxy-Fuel Cutting Equipment, Gas Apparatus & Regulators, Electrodes, Filler Metals & Fluxes, Stick Welding & Carbon-Arc Equipment, TIG Welding Equipment, MIG & Sub-Arc Equipment, Plasma Welding & Cutting Equipment, Hard Surface Technology, Safety Equipment & Supplies, Fume & Pollution Systems.
